

## Equipment needed for on-site W4 BPM Suite 2006 R2 training sessions

For the on-site **W4 BPM Suite 2006 R2** training sessions, the customer company is responsible for providing the necessary equipment at the site where the training session takes place.

### Computer equipment requirements:

- **Hardware configuration :** A PC per person (maximum 2 people) :
  - **1 Go memory.**
  - **1 Go available disk space.**
  - A CD-ROM drive.
  - An account with local « administrator » rights on the PC.
  
- **Software configuration:**
  - W4 Studio installed on the PCs.
  - A W4 Engine server installed (per PC or with remote access to a W4 Engine Server).
  - A text editor such as UltraEdit.
  - **For a Java environment**
    - JDK version 1.5.x.
    - Tomcat version 5.5 with W4admin.war deployed.
    - Eclipse 3.3.
  
  - **For a .Net environment**
    - Visual Studio .NET 2005.
    - Framework .NET SDK 2.0 (automatically installed with Visual Studio .NET 2005).
    - MSDN from Framework .NET 2.0 (for ease of use).
    - Documentation .Net W4 (installed from MSI).
    - Microsoft IIS.
    - Execute - after installing the above - the following DOS command to register .NET 2.0 as the default .NET framework for IIS:  
`'aspnet_regiis -i'`  
in the directory :  
`'C:\WINDOWS\Microsoft.NET\Framework\v2.0.50727'`
  
- **A hub and cables** to network the PCs.  
An extra cable to connect the teacher's laptop.

### Trainer equipment requirements:

- **A video projector** supporting the video mode **XGA (1024x768)**.
- **A white board** or at least a paper board with sheets and appropriate markers (board or paper).
